

SITE-SPECIFIC PMP STUDIES

AN ALTERNATIVE TO GENERALIZED PMP VALUES FOR DAM AND SPILLWAY DESIGN

North American Weather Consultants, Inc.

8180 S. Highland Dr., Suite B-2 Sandy, Utah 84093 * 801-942-9005 * nawc@nawcinc.com

WHY A SITE-SPECIFIC PMP STUDY?

- Updated PMP values; potential reductions in dam/spillway construction or remediation costs via reduced PMF.
- Potential for enhanced water management options, i.e., the ability to hold more water.

WHO ARE OUR CLIENTS?

- Dam owners/operators facing licensing/re-licensing, retrofit or repairs.
- Engineering companies serving dam owners/operators.

WHAT WE OFFER

- Phase I - Feasibility Studies identify critical issues and indicate the likely outcome of a full study. Phase I studies limit cost exposure, providing a first look at pivotal project-specific factors.
- Phase II - Full PMP Studies address several important site-specific factors affecting PMP, yielding well documented, highly focused, refined estimates.

STUDY ACCEPTANCE, A CRUCIAL FACTOR

- We and our clients enjoy a large and steadily growing track record of PMP study acceptance by regulatory agencies.
